Guidelines & Statements - American Heart Association

The current 2015 guidelines define the target depth for adult compressions to be between 2-2.4 inches or 5-6 centimeters. Research analyzed by the ILCOR revealed that this new recommendation may lead to a decrease in the risk of resuscitation-related injuries including rib fractures.

2015 - 2020 BLS Guideline Updates - Online BLS Handbook

The 2015 guideline now defines the target depth for adult compressions to be between 2-2.4 inches (5-6 centimeters). Research reviewed by the ILCOR revealed that compressions delivered beyond this depth may result in an increased risk of resuscitation related injuries, such as rib fractures, which is what led to this change in 2015 guidelines.

2015 - 2020 BLS Guideline Changes

The guidelines contain detailed information about basic and advanced life support for adults, paediatrics and newborns, as well as information on the use of Automated External Defibrillators and other topics. The most recent set of RCUK guidelines were released in 2015. They were adapted from the 2015 ERC guidelines, and tailored to clinical practice in the UK.
