Ancient history is fascinating, but it can be difficult to find material that teaches it from a Christian perspective. Even harder is finding a history curriculum that captivates students. But Angela O'Dell's newly revised *The World's Story 1 - The Ancients* does both! Students will learn all about the ancient civilizations of the Middle East, Europe, Africa, Asia, and the Americas from a strong Biblical perspective. Focuses on History and interweaves a Christian perspective throughout. Features an engaging historical

It is astonishing to think that many great archaeological discoveries occurred in Egypt only by way of accident during the 19th and 20th centuries. Even today accidents still play a vital, frequent and sometimes comical role, with new discoveries happening almost weekly and with many more secrets of the ancient Egyptian civilization still remaining. This book takes readers beyond these discoveries and their associated accidents. This book cannot be considered purely as an Egyptological and archaeological reading or even as dry history pages covering Egypt's modern era of the 19th and 20th

centuries. Rather, it is a book that sheds light on the intimate links between the birth of Egyptology after the deciphering of the famous Rosetta Stone and the raging world politics and regional power shifts in Egypt and its surroundings. The book ties together the political storms of colonialism in the first half of the 19th century and the unsettling effect these upheavals had on Egypt during the reign of Mohamed Ali Pasha. In a storytelling style, the book is a journey through time and place. The book takes readers on a guided tour to most of Egypt's well-known monuments that were mainly

discovered by simple accident or in which an accident played a major part leading to discovery. In addition, the book leads readers through time exploring ancient Egypt, the days of the pharaohs, ancient gods, rituals and public ceremonial festivals, with old and new stories that shed light on the true value of such discoveries in antiquity and modern day.

central Bosnia and Herzegovina, yet one in particular has achieved worldwide attention over the last decade. Found in the small town of Visoko, located about thirty kilometres northwest from Sarajevo, the hill is the tallest point in a landscape of tremendous historical importance for the country. The region has been occupied from prehistoric times. Rich in natural resources, the area was extensively quarried for metal ore and stone over many periods. In the medieval period (twelfth to fifteenth centuries CE), this area became the centre of the Kingdom of Bosnia. It was here that the first king of

Bosnia, Tvrtko I, was crowned in 1377 CE. During this time the large hill became known as Visocica, and a fortress was constructed upon its summit. From 1463, the Ottomans controlled them, and under their rule, many towns were founded, including Visoko which experienced a surge of economic development and cultural activity and became one of the richest towns in Bosnia. The town was of key importance in Bosnia's modern history, serving as a stronghold for Bosniak forces during conflict in the 1990s. However, it is not for these reasons that the hill of Visocica is so well-known today. Instead, the

focus of attention has been on the controversial claim that it is the largest and oldest man-made pyramid to be found, not only in Europe, but the world. Since 2005, the Bosnian-born American businessman and self-proclaimed archaeologist Semir Osmanagic has promoted a controversial narrative of how-and why-the hill exists. He maintains that Visocica is not a natural feature, but was made by an ancient Bosniak civilization during the last Ice Age, between ten and twelve thousand years ago. Its substructure is allegedly filled with an intricate network of passageways that connect

it to other structures in the surrounding landscape built during the same time. If true, the scale of these "pyramids" would have required the largest construction works to have ever been performed in prehistory. But this theory has been fiercely criticized by archaeologists, geologists, pyramid experts, journalists, and countless other academics and non-academics. Many scientific specialists and laypersons have gone to Visoko to see the site with their own eyes, and reported that there is little evidence to suggest the validity of Semir's claims. Furthermore, some of the claims made of the

pyramid are borderline science fiction, featuring everything from aliens to the mythical civilization of Atlantis. Through the use of popular and journalistic media, rather than academic channels, Mr. Osmanagich has garnered the attention of many hundreds of volunteers that come to Visoko each year. Conflicting accounts testify to what takes place. Is legitimate archaeology being carried out, or the creation of a money-making theme park for tourists? Can the Bosnian pyramid be considered genuine, or is this but one example of widespread and pseudoscientific "pyramid-mania" that occurs

across the globe? Why do people believe in the fantastic stories woven around the Pyramid of the Sun, and why is the academic community so critical of this phenomenon? And who, exactly, is Semir Osmanagich, without whom this story would not exist? The Ancient Bosnian Pyramids: The History and Mystery Over the Controversial Pyramids in Bosnia and Herzegovina chronicles the theories and debates over the landmarks. Along with pictures of important people, places, and events, you will learn about the Bosnian pyramids like never before.
