work like a gear. One end of the belt will be looped over the pulley located at the end of your crankshaft. The other end of the timing belt is looped over the pulley at the end of your camshaft.

How Do You Know When to Replace a Timing Belt? ?

Your timing belt should be replaced every 50,000–70,000 miles, depending on your car's make and model. Also, make sure you understand if your engine is an interference engine or a non-interference engine. In an interference engine, the valves and piston share the same airspace and the timing belt keeps them from touching. This is why you'll have a major engine failure on your hands if the belt breaks or skips.

How to Know When to Replace Your Timing Belt

Read Book Manual To Replace Timing Belt 2003

Kia Rio Renew the timing belt and tensioner – 1.25 and 1.6 litre engines Note: Although the normal interval for timing belt renewal is 100 000 miles or 8 years, it is strongly recommended that the interval suggested above is observed, especially on cars which are subjected to intensive use, ie, mainly short journeys or a lot of stop-start driving.
