As Felix Frankfurter and James Landis write in their preface to *The Business of the Supreme Court*, "To an extraordinary degree legal thinking dominates the United States. Every act of government, every law passed by Congress, every treaty ratified by the

Senate, every executive order issued by the President is tested by legal considerations and may be subjected to the hazards of litigation. Other Nations, too, have a written Constitution. But no other country in the world leaves to the judiciary the powers which it exercises over us." This classic volume, first published in 1928, originated in a series of articles written by Frankfurter, then a professor of law at Harvard University, and his student, Landis, for the Harvard Law Review. These articles chronicled and analyzed the many judiciary acts that were passed between 1789 and 1925, and illuminated the intimate connection between form and substance in the life of American law. For instance: When a community first decided to enact zoning laws--the Supreme Court

had to approve. When the United States made a treaty with Germany following World War I--the Supreme Court had to define the limits and meaning of the treaty. Newly reissued with an introduction by constitutional expert Richard G. Stevens, *The Business of the Supreme Court* is still as fresh and relevant today as it was when first published. It is a work that will aid the student of the law to both love the law and remain true to its purposes.

The Birthday of Eternity takes a lively, gonzo-like romp into the Victorian school story, a world replete with sex, decadence, and war. Oliver Wilde, an

ailing scholar, recalls his lost youth as a much-bullied student attending Malmedy--a Victorian boarding school on an English moor. Like his near-namesake, Oscar Wilde, Oliver hides his inner demons. A spiritless summer explodes when two likeminded adolescents invade his world: the sexually alluring Sabine Loy, endowed with an ability to see the dead, and the pleasure seeker, Lucien Gale, a decadent able to discern the soul's darkest secrets. The trinity embark on an odyssey, venturing into drugs and sex while pursuing every precious moment of life. Oscar's captivation turns to horror when a pair of mysterious deaths disrupts Malmedy. What does Oliver have to do with the tragedies? What dreadful deeds does he conceal? And what strange fate lies ahead for the trio as a dying century

A first step in developing a clean and sustainable future is to think differently about everyday products, in particular how they influence energy use. *Green Nanotechnology: Solutions for Sustainability and Energy in the Built Environment* explores the science and technology of tiny structures that have a huge potential to improve quality of life while simultaneously achieving reductions in the use of fossil fuels. This book examines energy flows in nature and how the optical properties of materials can be designed to

harmonize with those flows. It then discusses the properties that can be achieved in real materials to take advantage of nature ' s energy flows. The authors cohesively examine a number of topics, highlighting their applications and the significance of their nano features. They provide a cursory discussion of well-reviewed subjects such as nanostructured solar cells and turn their attention to timely topics such as methods for preventing excessive temperature and approaches to passive cooling. The book identifies key materials and elucidates how their properties can be understood in terms of contemporary materials physics and chemistry. It concludes with a detailed description of a scenario for future buildings that use much less energy while also providing better comfort. A valuable

side effect of most nanotechnologies is that they inherently put us in closer touch with the natural world. With broad coverage of how nanoparticles impact energy use in the built environment, this book opens readers ' eyes to a fascinating vision of how technology and nanoscience can merge and lead to commodity-scale products that help preserve our planet.
