"The text is suitable for a typical introductory algebra course, and was developed to be used flexibly. While the breadth of topics may go beyond what an instructor would cover, the modular approach and the richness of content ensures that the book meets the needs of a variety of programs."--Page 1.

CK-12 Foundation's Single Variable Calculus FlexBook introduces high school students to the topics covered in the Calculus AB course. Topics include: Limits, Derivatives, and Integration.

Introduce basic terms and concepts with hands-on projects, wall charts, flash cards and math art pages. The comprehensive Math Phonics program uses rules, patterns and memory techniques similar to those found in language arts phonics and provides alternative or supplemental materials to help students understand, learn, appreciate and enjoy geometry. Also includes word problems and a section on metrics.

"Connect is a four-level, four-skills American English course for young adolescents. Connect encourages students to connect to English through contemporary, high-interest topics and contexts, fun dialogs, and games. Each student's book includes grammar and vocabulary presentations and a multi-skills, graded syllabus"--Provided by publisher.

Tour of a Lesson PRE-READING introduces students to the theme of the reading. It does this by introductory pictures and asking questions about them to test their understanding of the vocabulary in the reading text. This is done through matching exercises and choosing the correct answers from a supplied list. READING TEXT focuses the students on the reading and requires students to reflect on their pre-reading activities when applicable. Students read silently first. They are not expected to understand every word; they should be encouraged to read for the general meaning and to use contextual clues and their university background knowledge to aid comprehension. Many of the readings are in the form of conversations involving many people. This gives the students the opportunity to perform role play and switch roles. COMPREHENSION QUESTIONS provides students with an opportunity to read the whole text or parts of it while looking for specific information to answer a set of comprehension questions. In addition, students are asked to identify meanings of words and expressions in the reading text. This practice allows them to make inferences about meanings and asks them to demonstrate their comprehension of the readings in a variety of ways, such as using vocabulary in context. VOCABULARY & UNDERSTANDING introduces vocabulary in context. Students match different vocabulary items with their descriptions. This section tests students ' understanding of the readings by asking content questions. LANGUAGE FOCUS includes grammar in practice where students are asked to differentiate between grammatical structures and understand their functional usage. Students are also asked to provide written output in the form of linguistic structures which reflect the structures covered in the readings.

Thrill young astronomers with a journey through our Solar System. Our resource presents science concepts in a way that makes them accessible to students and easier to understand. Introduce students to the solar system. Explain how it is made up of planets, moons and asteroids. Then, travel to each of the inner and outer planets. Build a scale model of the solar system, and plan your trip to one of its planets. Your next stop, the moon. Learn the different phases of the moon and figure out what a Blue Moon is. Take a look at the stars and compare yellow dwarfs with blue giants. Create a presentation detailing the story behind your favorite constellation. Finally, compare asteroids, meteors and comets as they travel through our solar system. Aligned to the Next Generation State Standards and written to Bloom's Taxonomy and STEAM initiatives, additional hands-on experiments, crossword, word search, comprehension quiz and answer key are also included.

Get the big picture about the Universe with our Space and Beyond 3-book BUNDLE. Start things off in our own backyard with a look at our Solar System. Travel to each of the inner and outer planets. Build a scale model of the solar system, and plan your trip to one of its planets. Next, travel a little further out to look at Galaxies & The Universe. Learn how distance is measured in light years, and how far the next closest star is to Earth. Find out how much you would weigh on the sun, moon and planets. Finally, learn what it's like to live in space with Space Travel & Technology. Blast off into space with manned and unmanned spacecrafts. Learn about life aboard the International Space Station, and predict how different toys would work in space. Each concept is paired with hands-on activities and experiments. Aligned to the Next Generation State Standards and written to Bloom's Taxonomy and STEAM initiatives, additional crossword, word search, comprehension quiz and answer key are also included.

This is the chapter slice "Constellations" from the full lesson plan "Solar System" Thrill young astronomers with a journey through our Solar System. Find out all about the Inner and Outer Planets, the Moon, Stars, Constellations, Asteroids, Meteors and Comets. Using simplified language and vocabulary, concepts such as planetary orbits, the asteroid belt, the lunar cycle and phases of the moon, and shooting stars are all explored. Chocked full of reading passages, comprehension questions, and hands-on activities, our resource is written for remedial students in grades five to eight. Science concepts are presented in a way that makes them accessible to students and easier to understand. Use our resource effectively for whole-class, small group and independent work. Color mini posters, Rubric, Crossword, Word Search, Comprehension Quiz and Answer Key are all included. All of our content meets the Common Core State Standards and are written to Bloom's Taxonomy and STEM initiatives.

This is the chapter slice "Cell Structures & Functions" from the full lesson plan "Cells, Skeletal & Muscular Systems" What do cells, bones and muscles have in common? They are all part of the human body, of course! Our resource takes you through a fascinating study of the human body with current information written for remedial students in grades 5 to 8. We warm up with a look at the structures and functions of cells, including specialized cells. Next, we examine how cells make up tissues, organs and organ systems. Then the eight major systems of the body are introduced, including the circulatory, respiratory, nervous, digestive, excretory and reproductive systems. Then on to an in-depth study of both the muscular and skeletal systems. Reading passages, activities for before and after reading, hands-on activities, test prep, and color mini posters are all included. All of our content is aligned to your State Standards and are written to Bloom's Taxonomy and STEM initiatives.
